To Whom It May Concern,

I am very please with the recommendation from Teletec Systems Inc. on purchased the Restaurant Manager POS System at my second location since last year June 2002 over the previous POS system I have used. After using it for about 6 months, we have completely switched over to Restaurant POS system for both locations.

The Restaurant Manager POS system has provided both stability and flexibility and easy of use both at front and back office. It used to take days to train a server or a manager to use the system. Now, it is just a matter of 15 minutes to half an hour. The split check and unsplit check functions are so fast and easy to use so that it is no longer a problem for us to do a split check during a busy dining time. Finger print attendance module has provided great control over staffs attendance and reduce fraud. Delivery module is an excellent way to monitor the number of times customer have come back. Restaurant Manager POS system is the solution to restaurant management.

Thank again for great support and service from Teletec System Inc.
